Q: NativeScript Angular - How to update the binding variable in ngFor I have some list where I want to add new element to the list. My list is: `{{ name }}` is the binding variable. Component: `export class ListComponent implements OnInit { items: ObservableArray; listOfPerson: ObservableArray = new ObservableArray(); ... init() { this.getListOfPerson(); } getListOfPerson() { this.service.getAllPeople().subscribe(people => { this.listOfPerson = people; this.items = this.listOfPerson; }, (err) => { this.selectedItem = new Person(); }) } ... }` So I want to add a new item to the observableArray and I want to see it updating, but currently I have no idea how to bind observableArray to the template binding variable `this.listOfPerson`. If I move
