It is the first one I've played in a while and it has several features that interest me, so I'm gonna share some thoughts about it. 1.

**Ambiguity** One of the first things I noticed in the game was the clarity of the descriptions. I mean, they were useful! For example: " You have to take a rest somewhere during your journey. Make yourself comfortable. " Yup. That's right. You'll need to stop every once in a while to rest, but you'll have the choice of making yourself comfortable. When I first played the game, I expected to have to build a shelter, but that's not what the game showed. A few times, it showed a tent, but not always. That made sense since the game was made in 1997, but still... that can cause confusion, especially with people who don't know the history of the game. 2. **Short text descriptions** The text is very short, and that can be a bad thing. It's ok for some very old games, but nowadays it's definitely not. Sometimes I prefer to have a longer text description, and this game is one of those situations. Most times, it's not a problem, but there are occasions when the text is just too short. 3. **Art design** The only artwork

---

in the game are the sketches of the characters. I think it's a very clever decision because it can be used by kids to explain how the game works. It's a bit like "The Oregon Trail" cartoon, where you can see how each character acts. And there's more! I found it interesting how the text for descriptions is not colored and it shows when you have to read it. Also, the book has very useful tips, like how to read and how to manage to get the most out of the game. 4. The ending "The Game" As soon as you start playing the game, you realize it is a really different and interesting approach for a game. You have a character that is the main character in the game, but the story continues as a prologue. You need to finish the game in order to learn what happened in the "past" of the game. The ending of the game is very interesting, and I think it's very creative, but I must say I didn't enjoy playing it. I prefer to play games with 82157476af
